UNIVERSITY OF OXFORD.

(Founded 872.)

	Elected.
CHANCELLOR, the Earl of Derby	1852
HIGH STEWARD, the Earl of Carnarvon	1859
VICE-CHANCELLOR, J. P. Lightfoot, D.D., Rector of Exeter College	1862
REGISTRAR, E. W. Rowden, D.C.L., late Fellow of New College	1853

The following statement gives the chief particulars concerning the *University of Oxford* as a place of Education in its relations to Medicine.

The affairs of the University are managed, and its regulations are made, either by a Convocation consisting of all Doctors in Divinity, Law, and Medicine, and Masters of Arts, or by the Resident Doctors and Masters, or by the Council.

There are 24 Colleges and Halls in Oxford. Every Student must reside in one or other of these for a period of three years.

During these three years, he has to pass three Examinations in Arts, and one in either Mathematics, Natural Science, or Law and Modern History.

A Student deciding to graduate in Medicine should proceed as follows:

1st. To enter at a College or Hall.

2nd. To pass all the Examinations in Arts.

3rd. After the Final Classical Examination, to pass two years in study prior to a Scientific Examination for the Degree of Bachelor of Medicine; and two years more prior to the final or practical Examination for the same Degree.

This Degree confers the Licence to Practise. There is no subsequent Examination for the Degree of Doctor in Medicine. For that Degree a dissertation has to be publicly read three years after the B.M.

4th. Besides the three Examinations in Arts the Student must pass one of the three Schools above-named—Mathematics, Natural Science, and Law and History.

The instruction in Natural Science is carried on at the MUSEUM, where the following Teachers have their Departments:—

Regius Professor of Medicine, and Clinical Professor, H. W. Acland, M.D., LL.D., F.R.S.
Savilian Professor of Astronomy, W. F. Donkin, M.A., F.R.S.
Savilian Professor of Geometry, Henry J. S. Smith, M.A., F.R.S.
Professor of Experimental Philosophy, R. Walker, M.A., F.R.S.
Deputy-Professor of Experimental Philosophy, G. Griffith, M.A.
Professor of Natural Philosophy, B. Price, M.A., F.R.S.
Professor of Geology, J. Phillips, M.A., LL.D., F.R.S.
Professor of Mineralogy, M. H. N. Story Maskelyne, M.A.
Professor of Chemistry, Sir B. C. Brodie, Bart., M.A., F.R.S.
Linacre Professor of Physiology, G. Rolleston, M.D., F.R.S.
Professor of Zoology, J. O. Westwood, M.A., F.L.S.
Lee's Reader in Anatomy, W. S. Church, B.A.
Lee's Reader in Chemistry, A. G. V. Harcourt, M.A.
Demonstrator in Anatomy, Charles Robertson, Esq.
Radcliffe Librarian, H. W. Acland, M.D., F.R.S.
Sherardian Professor of Botany at the Botanical Garden, C. G. B. Daubeny, M.D., F.R.S.

The Medical Examinations take place annually in the Michaelmas Term.

Scholarships of about the value of £75 are obtainable at Christ-Church, Magdalen, and other Colleges, by competitive Examination in Natural Science. Every year a Radcliffe Travelling Fellowship is competed for by any who, having taken a first class in the Natural Science School,

propose to study Medicine. The Travelling Fellows receive £200 a year for three years, half this period being spent in study abroad.

More detailed information concerning the University may be obtained from the University Calendar, to be purchased of any Bookseller; concerning the General Education, from the Heads of Colleges; concerning the Medical Examinations, from the Regius Professor of Medicine; and concerning the Scientific Education, from the Professors in the several Departments, as above named.

The course of lectures on Physic consists of fifty (twenty on general and thirty on special Pathology), delivered during the Lent and Easter terms.

The course on Human Anatomy consists of seventy, delivered during the Michaelmas and Lent terms, by Dr. Humphry.

The course on Chemistry consists of fifty, delivered during the Lent and Easter terms.

The course on Botany consists of twenty, delivered during the Easter term.

The Downing Professor delivers a course of fifty lectures on some subject connected with the study of Medicine in the Michaelmas and Lent terms.

The Professor of Anatomy delivers a course of twenty-five lectures on Comparative Anatomy during the Michaelmas term.

Dr. Humphry delivers a course of lectures on Surgical Pathology during the Summer.

Pupils have an opportunity of dissecting in private.

There is a rich and interesting Anatomical Museum open to medical students daily.

Students are admitted to the medical and surgical practice of the Hospital on the payment of 10*l.* 10s. for a year, and an additional 5*l.* 5s. for an unlimited period.

Medical Students are required to enter at one of the seventeen Colleges (it matters not which), and reside there nine terms (nearly three years), during the first half of which time they are generally occupied in the study of Classics, Mathematics, &c., in their respective Colleges; then, having passed the previous Examination in these subjects, analogous to the preliminary examination required at the University of London, they can pursue the study of Medicine, attend the practice of the Hospital, and the Professor's lectures above specified. This done, they may continue their medical studies in Cambridge, or elsewhere.

If it be thought desirable, the student may continue his classical and mathematical reading for a longer period than the above arrangement contemplates; and may, in due time, present himself for the second Examination in those subjects whereby he becomes B.A.; but this is optional.

PROCEEDINGS IN PHYSIC. M.B.

The candidate for M.B. must have resided nine terms (nearly three years), have passed the previous Examination in Classics, Mathematics, &c., and have been engaged five years in medical study, of which six terms must have been in the University. Only four years of medical study, of which *four* terms are in the University, are required of those who graduate with honours as B.A.

There are two Examinations for M.B. The first after three years of medical study. The subjects are Chemistry, Botany, Elements of Comparative Anatomy, Human Anatomy and Physiology, Materia Medica and Pharmacy, Pathology, Portions of Celsus, Hippocrates, and Aretæus.

The student, before admission to this first Examination, must produce certificates of attendance on lectures on Chemistry, including manipulations, Botany, Elements of Comparative Anatomy,

Digitized by Google

Human Anatomy and Physiology, Pathology, Materia Medica and Pharmacy, of dissection during one season and of attendance on Hospital Practice.

The second Examination is after the completion of the course of medical study. The subjects are Pathology and Practice of Physic, Clinical Medicine, Medical Jurisprudence, the medical treatment of Surgical and Obstetrical Diseases. The student, before admission to this second examination, must produce certificates of attendance on lectures on Principles and Practice of Physic, Clinical Medicine, Clinical Surgery, Medical Jurisprudence, and Obstetrical Medical, and of attendance on Hospital Practice for three years.

After the Examinations have been passed, an Act must be kept. The candidate reads a thesis composed in English by himself on some subject approved by the Professor. He is then questioned in English by the Professor on the subject of the thesis, and on other subjects in the faculty of a more general nature.

M.D.

The candidate can be admitted to the degree of M.D. in the ninth term (nearly three years), after taking the degree of M.B. A Master of Arts may be admitted to the degree of M.D. at the prescribed period, when he has produced the same certificates and passed the same Examinations as are required for the degree of M.B.

An Act has to be kept similar to that required for M.B.

M.C.

The candidate for the degree of MASTER IN SURGERY is required to pursue the same course as for M.B. during the first three years, *i.e.*, during his residence in the University, and to pass the same First Examination.

He must attend the Surgical practice of a Hospital for three years, and be House-Surgeon or Dresser during six months; must attend Lectures on Human Anatomy (two courses with dissections during two seasons, on Surgery, Clinical Surgery, Midwifery (with ten cases), and Medical Jurisprudence.

The Second Examination, after the completion of the period of study, is in Practical and Surgical Anatomy, Principles and Practice of Surgery, and Clinical Surgery, Midwifery and Medical Jurisprudence.

The full time required for the degrees of M.B. and M.C., from entrance at the University, is *four* years in the case of those who graduate with honours, as B.A.—*i.e.*, who go through the examination for either the Mathematical, Classical, or Natural Sciences Tripos. Many Medical Students take this course, and go through the Natural Sciences Tripos, because the subjects of the examination (Botany, Chemistry, and Comparative Anatomy), are akin to those of Medicine; and the Student who has passed in any of them is not required to be again examined in those for M.B. or M.C. In the case of Students who do not graduate with honours, the time required to obtain the M.B. and M.C. degree is *five* years. The expenses at Cambridge, including residence, lectures, &c., are about 150*l.* per annum; but these are in many cases lessened by Scholarships, which are very numerous, and obtainable by most Students of industry and ability.

UNIVERSITY OF DURHAM.

For the Licence in Medicine.—Residence at Durham is not imperative. A candidate must have passed one of the Arts Examinations in the list recommended by the General Medical Council, after which he must have been registered at Durham or Newcastle, as a Medical Student. He must produce certificates of having afterwards spent four years in Medical Study, according to the subjoined Curriculum, at the College of Medicine at Newcastle, or at some other Medical School recognised by the University; of good moral conduct, and of having attained the age of twenty-one years.

For the Mastership in Surgery.—The regulations are the same as those for the License in Medicine, except that the final Examination is directed more particularly to Surgery.

Curriculum.—Candidates for the Licence in Medicine, and for the degree of Master in Surgery, must bring certificates of having, during their four years of study, attended two six months' courses of lectures on Anatomy and on Physiology, on Medicine and on Surgery. One six months' course on Chemistry. Of having been engaged in Dissections for two winter sessions. Of having attended two three months' courses of Lectures and Demonstrations on Morbid Anatomy. One three months' course of Lectures on Botany, on Materia Medica, on Practical Chemistry, on Midwifery, and on Medical Jurisprudence, and of having been engaged in Practical Pharmacy for three months.

For the Degree of Bachelor in Medicine.—Residence during three terms at Durham is necessary. A candidate must have obtained a Degree in Arts of the University of Durham, or have passed the final Examination for the Degree of Bachelor of Arts, or one equivalent thereto; must be a Licentiate in Medicine of the University, and of the standing of twenty-one terms (seven years) from the date of his Matriculation at Durham.

The Examination consists in writing an Essay on some Medical subject appointed by the Warden and Senate, and in passing an Examination thereon.

For the Degree of Doctor of Medicine.—A candidate must be a Bachelor in Medicine of the University of Durham, and of the standing of twenty-four terms (eight years) from the date of his

Matriculation at Durham. The Examination *is similar to that for the Degree of Bachelor* in Medicine. The Examinations for the Licence in Medicine and the Degree of Master in Surgery, are conducted partly at Durham, by printed papers of questions and viva voce, and partly at Newcastle, in a practical manner in Anatomy, Surgery, Chemistry, and Medicine. The Examinations for the Degrees of Bachelor and Doctor in Medicine are conducted at Durham. The Examinations are held, except in special cases, yearly, in the month of June, at the close of Easter Term. The Licences and Degrees are conferred in Convocation at Durham. The Examiners are appointed yearly by the Warden of the University, and approved by Convocation.

Registration Examination. — The Registration Examinations will be held on April 25, and Sept. 19, 1865.

The following are the subjects of Examination:—1. The History contained in St. Luke's Gospel. 2. English Grammar and Writing from Dictation. 3. Arithmetic, including Vulgar and Decimal Fractions. 4. History of the Reign of Anne. 5. To draw from memory an outline Map showing the coast line, the chief ranges of mountains, and the principal rivers of some one of the following countries, to be selected by the Examiners:—Great Britain, France, Spain. Questions also will be set in the Geography of these countries. 6. Translations, with grammatical questions from some one of the four following subjects, to be selected by the candidates:—1. Cæsar de Bello Gallico, Book i. 2. Cicero, de Senectute. 3. Virgil. Second Book of the Æneid. 4. Horace. Third Book of the Odes. 7. Any candidate may, if he pleases, offer himself for examination in any one or more of the following three subjects: First Book of Euclid. Voltaire's Charles XII.; and French Grammar; Xenophon's Memorabilia; and Greek Grammar. Candidates who wish to be examined on any of these subjects must give notice of their intention ten days, at least, before the Examination.

PROVINCIAL MEDICAL AND SCIENTIFIC SOCIETIES.

ASSOCIATION OF MEDICAL OFFICERS OF ASYLUMS AND HOSPITALS FOR THE INSANE.—Established 1841. *Pres.*, Dr. H. Munro, (13, Cavendish-sq. London); *Ex-Pres.*, Dr. Skae (Roy. Edin. Asyl.); *Pres. Elect*, Dr. W. Wood (54, Upp. Harley-st. London); *Treas.*, Dr. Paul (Camberwell); *Audit.*, Dr. Helps (Bethlehem Hosp.) and Mr. R. Sankey (Oxford Co. Asyl.); *Hon. Gen. Sec.*, Dr. Tuke (37, Albemarle-st. Piccadilly, (London); *Hon. Sec. for Irel.*, Dr. Stewart (Asyl., Belfast); *Hon. Sec. for Scot.*, Dr. Rorie (Roy. Asyl., Dundee); *Edit. of Journ.*, Dr. L. Robertson (Hayward's Heath, Sussex), and Dr. Maudsley (38, Queen Anne-st. London.

The objects of the Association are the improvement of asylums and hospitals for the insane: the acquisition and diffusion of a more extended knowledge of insanity and its treatment; and the promotion of a free communication on such subjects between the Members. It consists of Medical Officers of Hospitals and Asylums for the Insane, public and private, and of legally-qualified Medical practitioners, otherwise engaged in the treatment of insanity.

The election of Members takes place by ballot at the Annual Meetings, a majority of two-thirds of those present being required for the election of each candidate. Each Member pays an Annual Subscription of one guinea.

The Annual Meeting is held in July, either in London, or, if so agreed at the preceding meeting, or after circular to each Member, in some provincial town or city where, or in the neighbourhood of which, there is a Public Asylum, or where some other object is likely to attract the Members.

The Annual Meeting for 1864 will be held in London, in July, under the presidency of Dr. W. Wood.

Mr. Churchill publishes the quarterly journal of the Association, viz.:—"The Journal of Mental Science," a copy of which Members are entitled to receive gratuitously. Communications for or regarding the Journal to be forwarded to the Editor, Dr. Robertson (Hayward's Heath).

BEDFORD LITERARY AND SCIENTIFIC INSTITUTION.—Established 1850. *Pres.*, Rev. E. G. Bayley; *Vice-Pres.*, Rev. W. Alliott, Dr. Barker, Messrs. Hurst and Wyatt, Rev. R. W. Fitzpatrick, and Rev. J. W. Haddock; *Hon. Sec.*, Dr. H. Steinmetz (121, Offa-st.), and Mr. Rudge.

Fletcher, M.D., Clayton, and Dr. Russell.

Since the commencement, the sum of 3846*l.* 12*s.* has been administered in half-yearly grants, most of the recipients being Widows with Families, and in seven instances Practitioners disabled by disease.

The value and importance of the relief thus granted may be best appreciated by the fact that, in two instances, in which Fourteen Guineas only had been paid in Subscriptions, the sums of 415*l.* in one, and in the other 780*l.*, have been granted; and that in the latter case the Widow is still enjoying the bounty of the Society; whilst in the former, the assistance was discontinued by the request of the recipient, in consequence of the amended state of her circumstances. In other cases sums varying from 80*l.* to 200*l.* have been granted.

*BIRMINGHAM.—MIDLAND MEDICAL SOCIETY.—Established 1852. *Pres.*, Dr. Russell; *Vice-Pres.*, Mr. Furneaux Jordan and Mr. J. T. Gamgee; *Treas.*, Mr. J. Clay; *Hon. Secs.*, Dr. A. J. Architect—C. W. Savage, Esq.

To facilitate reference to this List, the following explanation is necessary:—

1. The COUNTIES are arranged *alphabetically*; as are also the UNIONS under each County.

2. Each *paragraph* contains the particulars of *one union*. The name of the Union is given in *small capitals*, and the name of each district in *italics*. The letter P. is placed before the *Population*, and the letter A. before the *Area* in *Acres*. Then follows the name of the Medical Officer, with the amount of his salary.

3. To a few of the Unions an asterisk * has been prefixed, to signify that the Clerks of such Unions have not replied to the inquiries forwarded to them. For the correctness of the entries so marked, the Editors do not hold themselves responsible.

4. In those cases where the amounts of extras have been given, it may, *as a rule*, be inferred that both medical fees and vaccination charges have been included.
